
Phospho Serine Rabbit Polyclonal Antibody

www.dia-an.cn

Cat#: 3192

027-59325199

sevice@dia-an.com

Only For Research. Not For Diagnosis.

Attribute:	Rabbit Polyclonal Antibody
Isotype:	IgG
Purity:	Antigen Affinity Purification
Application:	WB, IP, ELISA
Reactivity:	phospho Serine Protein
Immunogen:	phospho Serine Peptide
Buffer:	PBS with 0.1% sodium azide and 50% glycerol, pH 7.2
Storage:	Store at -20°C. Do not aliquot
Recommended Dilution:	WB: 1:1000-2000 IP: 1:5000-10000

Background:

Serine is one of the proteinogenic amino acids. By virtue of the hydroxyl group, serine is classified as a polar amino acid. A hallmark of signal transduction pathways is the reversible phosphorylation of serine and threonine residues within specific sequences, or motifs, in target proteins. Specific signaling motifs include not only sequences that are recognized by protein kinases, but also those that are recognized by phosphorylation-dependent binding proteins like 14-3-3. These modular phosphoprotein interacting domains are critical elements in modulating, directing and amplifying intracellular communications. Many critical protein kinases can be regulated by phosphorylation at a specific serine or threonine surrounded by phenylalanine or tyrosine.
